SOPFEU

The three most common causes of avoidable fires are as follows: **cigarette butts** which account for 80 fires/year, **loss of control of an open air fire** 75 fires/year and **camp fires that are not extinguished properly** 60 fires/year. With more frequent and longer dry periods it is imperative that people develop better **habits to avoid the loss of life, property and damage to the environment**.

ROAD SAFETY

Summer is a busy time on our roads. They are taken over by various types of vehicles including tractors and other farm machinery needed for various jobs in the fields. Particular care must be taken in agricultural areas. We remind you that it is forbidden to drive on the shoulder of the road for all motorized vehicles, including tractors. You may pass a tractor when there is:

- A continuous single line
- A continuous double line
- A double line formed by a broken line and a solid line

In all cases, this must only be done when it is safe to do so. Be patient, that way everyone can reach their destination safe and sound.

Don't forget Fall Fest is on **October 4th, 5th and 6th**. We will be looking for help if anyone is interested, keep an eye out for the next meeting in September.
